ENGLAND AND THE REPOLUTION. There is an indefinable whoch in Europe languages, called in English the "reversions power over or, a spell, a thing of diabolical significan-to others it is a word of light, a premise tor, a spell, a thing of diabolical significance. To other it is a word of tight, a pressules of golden days, a pledge of a better time. English writers, looking at the use of the word in, continental discussions, have flattered in the modest word "progress"—but if lifted up its hands at "revolution." At length the notion that the eyeolution has begin here, too, is finding its way. The passage of a democratic feform bill, and the boldeness of even the agricultural poor, had caused a fear of the sort, but the attitude of, the unasses since the execution of the three Fenians at Manchester, puts the question beyond a doubt. That unfortunate set has been taken as a covaring sign that the governing classes have expansed themselves from the case of the sort of

to deal with it. The Salurday Review a comfort in the fact that if the revolu is to come on English soil it will assume such milder form and lead to much less also in the social advantages which he can command.

"No Thoroughfare," by Charles Dickens and Wilke Codins, is written purely for the stage. We have very little of Dickens and a great deal too much of his associate. There is no Dr. Marigold, or Mrs. Lirriper, or any other of those amasing peotele introduced to to us at Christmas time by Dickens. Clearly the American visit filled his head. No doubt in the theatre, the scene of the Ewiss villain attempting to nurder his companion in the wildest vart of the Bernese Alps, and the ambsequent rescule of the intended victim by her lover, who had followed her post haste, suspecting toul play, will bring down "the goods"—but it is not literature.

J. R. R.

case. Plunging the hand down into it make I bring out a few for special charactor-ation.

NEW RAILROAD BRIDGE. The Wilmington Structure Visit of Inspection-Testing.

A party of some thirty railroad and engineering gentlemen took a special one postering mbroing at the st. Louis & Atton Battroad depot, on the invitation of L. H. Bosmer, Key whose reputaat the St. Louise & Alton Basirosal depot, on the invitation of L. B. Bossener, Enq whose reputation as a bridge builder is known all over the United States, for the purspace of examining an iron rankway bridge, recently erected by him for he railroad company at Winnington. The party arrived there at about 11 o'clock, and spend an iron rankway bridge, recently erected by him for structure. It is built entirely of cast and errodice tron, with five distinct apass, usuall 56 feet long, after the Poot passes, which has not herectories that in the West. It contains much least trong the structure of the structure of

6.08.

to witnessing the tests detailed below, the
, who had been joined by the city officers of
 tand by other gentiumes along the name, arnd to the traits and enjoyed a sumptions colprovided by M. Boomer,
 cormal meeting was then organized by etectcoloned R. B. Mason Chairman and H. R.
at Secretary, and a commission or resoluwas appointed, who reported the following.

L.B. Boomer. Eq. cod, That we heartily commend the wise sound concerny of the management of ago & Alton Rairond in securing this fix-combination of inventee and contractor notion, a committee of engineers was apwa: committee of engineers appointed to re-results of the tests applied to the truis over the Kankakee River, at Wilmington, line of the Chicago & Alton Railroad, y L. B. Bosmer, on the plan patented by net, beg leave to submit the following report:
Previous to our arrival at the bridge the ser-ral span, excepting the one next the abutment on the next ideo of the river, had been adjusted to a load of twelve bundred and seventy pounds to a load of twelve bundred and seventy pounds to be load of twelve bundred and seventy pounds to be load of twelve bundred and seventy pounds to be load of twelve bundred and the load to be the load of twelve bundred and four boxs of railroad and the load of the load when the load of the load of the load of the load of the load when the load of the

speration of the road.

Maving witnessed the tosts, and having caretuily examined the bridge, we consider them entirely satisfactory, and the bridge remarkably
etrong and durable.
